## REPORT ON THE SEVENTH CENSUS OF CANADA, 1931

*To His Excellency Captain the Right Honourable the Earl of Bessborough, P.C.,  
G.C.M.G., Governor General and Commander-in-Chief of the Dominion  
of Canada:*

MAY IT PLEASE YOUR EXCELLENCY:

I have the honour to lay before Your Excellency the third volume of the Report of the Seventh Census of Canada taken as of date June 1, 1931, which contains the results of the Census on the ages of the people, classified by sex, conjugal condition, racial origin, religion, birthplace, language, literacy, school attendance, year of immigration, naturalization, etc.

I have the honour to be,

Your Excellency's most obedient servant,

HENRY H. STEVENS,  
*Minister of Trade and Commerce.*

OTTAWA, November 1, 1933.

## PREFACE

Volume III of the Seventh Census of Canada analyses the population data with ages as the basis of cross-classification. The materials of the volume are presented under eleven general heads or groups, (conjugal condition, racial origin, religion, birthplace, language, literacy, etc.)

The history and purpose of the census, the legislation under which it is taken, the methods of collecting, checking and compiling the data, are described in detail in the administrative report on the taking of the census which appears as Introduction to Volume I. Attention may be particularly directed to the section of this Introduction which outlines the general plan according to which the volumes of the census are being issued and which explains the nature of the materials contained in the present volume and their place in the general scheme. The plan in brief is as follows:—

Volume I, in addition to the administrative report above mentioned, consists of a series of descriptive chapters summarizing the data for each of the subjects included in the whole census preceded by a review of the growth of the Canadian population from the earliest time; with its appendices, it provides a *résumé* of the more important census results and of the technique adopted by the Bureau of Statistics in collecting and compiling the census data. In Volume II the data for each subject are given down to the smallest possible geographical areas, being limited to straight totals without cross-classification. The process of cross-classification and analysis is begun in the present volume with the subject of age as basis; of necessity, in view of the number and extent of the cross-classifications, these data can be shown only for the larger geographical areas. The process will be carried forward in subsequent volumes.

The distribution of the population under the various heads in this volume follows the general plan as to its classification as "Rural and Urban" which was outlined in Volume II and the reader is referred to page 139 of that volume for further explanation. In certain tables the grouping of the population is by the two major divisions of "Rural" and "Urban" while in others where it was thought the tabulation of the urban by groups of size would serve a useful purpose, the figures of population are shown for urban localities of 30,000 and over, for those 1,000 to under 30,000 and lastly for those under 1,000, which for some purposes should be combined with the rural figure.

The materials for this volume were prepared under the direction of Mr. E. S. Macphail, Chief of the Census Branch, assisted by Mr. A. J. Pelletier, Assistant Chief.

R. H. COATS,  
*Dominion Statistician*

## RAPPORT SUR LE SEPTIÈME RECENSEMENT DU CANADA, 1931

*A Son Excellence Capitaine le Très Honorable Comte de Bessborough, P.C., G.C.  
M.G., Gouverneur Général et Commandeur en Chef du Dominion du  
Canada:*

PLAISE À VOTRE EXCELLENCE:

J'ai l'honneur de déposer devant Votre Excellence le volume 3 du Septième Recensement du Canada effectué le 1er juin 1931. Le volume contient les données relatives à l'âge de la population classifiée selon le sexe, l'état conjugal, la race, la religion, le lieu de naissance, la langue parlée, le degré d'instruction, la fréquentation scolaire, l'année d'immigration, la naturalisation, etc.

J'ai l'honneur d'être,  
de Votre Excellence l'obéissant serviteur,

HENRY H. STEVENS,  
*Ministre du Commerce.*

OTTAWA, le 1er novembre 1933.

## PRÉFACE

Le volume III du Septième Recensement du Canada contient l'analyse des données relatives à la population avec l'âge comme base de recoupement. Les statistiques y figurent sous onze rubriques (état conjugal, race, religion, lieu de naissance, langue parlée, degré d'instruction, etc.).

L'historique et les fins du recensement, les lois en vertu desquelles il est effectué, ainsi que les méthodes ayant servi pour recueillir, vérifier et compiler les données, font l'objet d'un traitement détaillé dans le rapport administratif inséré au volume I. L'attention du lecteur est attirée tout spécialement sur la partie de l'introduction qui donne l'ordre de publication des divers volumes portant sur le recensement ainsi qu'un aperçu sur le genre des données figurant dans le présent volume et de la place que celles-ci occupent dans le plan général. En voici un bref exposé:

Le volume I, en plus du rapport administratif dont il est question ci-dessus, contient une série de chapitres descriptifs où se trouvent résumées les données relatives à chacun des sujets que comporte le recensement dans son ensemble; au commencement se trouve une revue traitant de l'accroissement de la population canadienne depuis l'époque la plus éloignée. Avec ses appendices, il constitue un résumé des résultats les plus importants du recensement et des méthodes dont s'est servi le Bureau Fédéral de la Statistique pour le recueil et la compilation des données. Dans le volume II, les chiffres portant sur chaque sujet sont donnés pour les moindres districts, mais les totaux y figurent sans recoupement. Le recoupement et le traitement analytique commencent dans ce volume, l'âge servant de base, mais en raison de la compréhensivité du recoupement, il a fallu le limiter aux divisions géographiques les plus importantes. Cette méthode sera suivie également dans les volumes subséquents.

La distribution de la population sous les différents en-têtes de ce volume suit le plan général de sa classification en tant que "rurale et urbaine" décrite dans le volume II et le lecteur est référé à la page 139 du volume pour plus ample explication. Dans quelques tableaux le groupement de la population est en deux divisions majeures: "Rurale" et "Urbaine" tandis que dans d'autres cas il est considéré que la tabulation de la population urbaine par groupes de différentes grandeurs servirait à des fins utiles, et les chiffres de la population sont donnés pour les centres urbains de 30,000 âmes et plus, pour ceux de 1,000 âmes mais moins de 30,000, et finalement pour ceux au-dessous de 1,000, qui pour certaines fins devraient être combinés avec les chiffres ruraux.

Le matériel du présent volume a été préparé sous la direction de M. E. S. Macphail, chef de la Branche du Recensement, avec la collaboration de M. A. J. Pelletier, chef-adjoint.

R. H. COATS,  
*Statisticien du Dominion.*
